

WANTED

Adult Physiatry Life Care Planner (We will Train You)

www.PhysiatryLifeCarePlanningAssociates.com

Physiatrist with 10-20 years' experience in adult muscular-skeletal, electrodiagnostics, neurological, pain management, and brain injury. Must understand the emotional consequences of injury to both the patient and family. Train with senior physiatrists and with certification education stipends. There is huge potential for professional and personal growth in this new specialty for Physiatrists.

Avoid insurance authorizations which limit time for patient care and physician financial reimbursements.

PART-TIME

One long (2-4 days) weekend (or mid-week) a month (3-6 patients). Review of records and report completion to be conducted with personal work flexibility from home and a virtual office.

Must be independent thinking but adaptable, have a quick wit with formidable intellect, versatility of interests and thoughts, and avoids mediocrity. Young at heart but with maturity. Must enjoy changes of pace and place; and enjoy adventure and stamina for experiencing life, with team and national stability.

Join four other Physiatrists (Adult and Pediatric) Master's Level Published Supporting Staff
